Report on the Successful Organization of Updates in Endocrine and Breast Surgery (EBSCON 2024)

Ref no IAES/2024/1 dated 22nd December 2024

Updates in Endocrine and Breast Surgery (EBSCON 2024), held on the 6th and 7th of December 2024, was the first academic event organized under the auspices of the EBS foundation by Department of Surgery, Postgraduate Institute of Medical Education and Research Chandigarh (PGIMER) in collaboration with Indian Association of Endocrine Surgeons (IAES) and ABSI. It was a resounding success and the conference welcomed 169 delegates, including a diverse group of national and international experts, practitioners, residents and other healthcare professionals.

The event provided a platform for critical discussions on advances and challenges in endocrine and breast surgery, fostering collaboration and idea exchange.

The highlights of the conference included:

- **Renowned Speakers:** Esteemed experts shared insights on emerging trends, innovative surgical techniques, and evidence-based practices, inspiring attendees.
- **International Perspectives:** Comprehensive discussions on managing micro-papillary carcinoma.
- **Panel Discussions:** Engaged in debates on complex case management.
- **Workshops and Video Sessions:** Featured minimally invasive and robotic surgery, radio-frequency ablation for thyroid nodules, vacuum therapy, and core biopsy for breast lesions.

We extend our heartfelt gratitude to everyone who contributed to the tremendous success of EBSCON 2024.

To the Indian Association of Endocrine Surgeons and the Association of Breast Surgeons of India - thank you for your unwavering support and expertise in shaping this event. Your support was instrumental in creating a platform for meaningful dialogue and knowledge sharing.

Together, we have set new benchmarks for collaboration and innovation. Thank you

Dr. Divya Dahiya
Organizing Chairperson

Dr. Siddhant Khare
Organizing Secretary
