2. Career counselling with MBBS and PG Students- 10th June 2025
One hour session each batch of around 100 students participated. Very interactive session by all the Panellists. Relevant photos are attached. Students also asked their queries regarding the carrier options. Discussion regarding pros and cons of Surgery as an option and which sub-speciality to choose were discussed in details.
 3. Endocrine Surgeons message video on all social media platforms.
IAES Members were requested to share their messages and the combined video was circulated on all social media platforms. This was made with intention to motivate young undergraduate students to take up Surgery as a subject and others to take inspiration from the lives of Surgeons. Details attached.
 4. Blood donation camp on 14th June 2025 in KGMU was organised in Transfusion Medicine department. More than 60 donors participated in the event. One motivation video to encourage others to donate blood was circulated on Youtube channel.

5. Thyroid Public Awareness Program and free Thyroid function test screening sampling for 100 patients in KGMU on 14th June 2025. This was done in front of Endocrine Surgery OPD in KGMU. Experts from KGMU and SGPGI participated. Resident doctors did a skit to create awareness and nurses made posters for creating awareness. Patients found the information very useful. Relevant pictures attached.
6. Case-based Multi-Disciplinary meet online –an initiative by Dr Siddhartha, Apollo Hospital, Hyderabad on 15th June 2025 on Zoom platform was done under the aegis of IAES banner.
7. Thyroid awareness and Mentor-Mentee interaction AI-Based tool launched by Dr Sanjay Yadav, Jabalpur was launched on 15th June 2025.
8. Dr Sanjay in Jabalpur Medical College conducted a free Thyroid awareness public program. Thyroid Awareness OPD – Surgeons Week 2025.

As part of Surgeons Week 2025, the Thyroid Awareness OPD was successfully conducted on Tuesday under the aegis of the Indian Association of Endocrine Surgeons (IAES) and Jabalpur Surgeons Association. The activity took place at NSCB Medical College, focusing on early detection and counselling for thyroid disorders. A total of 57 patients were evaluated, with cases ranging from goitre and thyroid nodules to suspected malignancies. Public awareness regarding thyroid health, cancer screening, and surgical options was emphasized. The initiative witnessed active participation from faculty, residents, and community members, promoting endocrine health in the region.
